## EVENT OVERVIEW

Now in its 19th year, The Mining Show stands as the Middle East & Africa's largest and most influential event for mining and quarrying.

Built as a platform for knowledge exchange, project development, and the showcasing of world-class equipment and technology, the event continues to attract the region's leading mining and quarrying companies.

The Middle East is undergoing a profound transformation, driven by the energy transition and bold new mining strategies that are reshaping the market. With new mining licenses being issued and government-led initiatives accelerating growth, opportunities for miners, investors, and infrastructure providers have never been stronger.

The Mining Show unites these opportunities - combining a supplier-led exhibition with a high-level, multi-track conference. Covering automation, investment, and efficiency, it delivers innovation and collaboration while drawing senior decision-makers from across the Middle East and Africa.

From the launch of key projects, and the latest exploration opportunities, to updates on regulation and operational excellence across multiple markets, the event is the region's essential annual meeting point for partners and buyers to drive progress.

Be part of the only event in the region where projects are advanced, partnerships are built, and business gets done.
